

Basic unit price of lithium-ion batteries for communication base stations

Overview

New York, December 9, 2025 - lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF (BNEF). To give buyers a quick reference, here's an estimated price range for telecom batteries by voltage, capacity, and chemistry. These figures are based on current market data and publicly available industry sources. Note: These are indicative. Hence, it is critical to select battery suppliers who provide different lithium-ion battery solutions for these towers. Choosing the right battery is instrumental in ensuring that communication networks remain functional even in extreme weather, long outage durations, or locations far from the. The global market for Lithium Battery for Communication Base Stations was valued at US\$ 3929 million in the year 2024 and is projected to reach a revised size of US\$ 7037 million by 2031, growing at a CAGR of 8. This granularity, along with our rigorously audited pricing methodologies - specific to each market and designed to prioritise. By Type: Lithium Iron Phosphate (LiFePO4) accounted for 92. By Application: 5G Base Stations represented 72.
