

Berlin electricity safety

GRADE A BATTERY

LiFePO₄ battery will not burn when overcharged, over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Overview

An arson attack on the Berlin power grid was carried out on January 3, 2026, resulting in power outages for more than 40,000 households and 2,000 businesses across southwest Berlin. Failure to do so may result in faults and supply disruptions in the electricity grid and, at the worst, cause harm to humans. It is therefore crucial to define responsibility for the.
