

Evee Energy Liquid Cooling Energy Storage System

Overview

Equipped with an independent liquid cooling system, it achieves higher energy density and enhanced heat dissipation within a compact footprint, while offering advantages such as high efficiency, low noise, safety, reliability, and easy scalability. Build an energy storage lithium battery platform to help achieve carbon neutrality. When integrated with PCS (Power Conversion). EVE was founded in 2001 and started to produce and sell lithium primary batteries in 2003. In 2009, it was listed on Shenzhen GEM with primary lithium batteries as its main business, and it was one of the first 28 companies listed on Shenzhen GEM. The capital market endorsement provides strong. EVE Energy has always adhered to the concept of "safety is the natural attribute of power batteries", with full technical route power batteries and full industry chain capabilities, to create a full-scenario solution for the energy Internet to help "carbon peak and carbon neutral".
