

Green energy management solutions

Overview

Managing energy use through energy management platforms can help to reduce environmental impact alongside improving operational efficiency. Green Solutions is a small engineering and consulting firm offering a broad range of professional services to both public and private sectors, specializing in the design of MEP (mechanical, electrical & plumbing) systems and energy management/auditing. 8% in 2024, hitting an all-time high of 37.8 Gt CO₂ according to the International Energy Agency. Managing. The industry is in the midst of a transition process towards a model with lower greenhouse gas emissions, which in turn seeks greater energy autonomy and competitiveness, all with a customer base that demands sustainability, quality and price, and that requires a wide range of energy services in. The benefits of green buildings extend beyond sustainability—they're proven to support better physical and mental well-being. Research shows that eco-conscious spaces improve indoor air quality, reduce allergens, and create a more comfortable environment.
