

Huawei power solar energy storage cabinet lithium battery bms

Overview

The ESM-48150A1 is an energy storage module based on innovative Li-ion technology. It is especially designed for telecom sites with advanced features: long lifespan, wide range of charging voltage, fast charging, intelligent management, and software anti-theft. Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series. Huawei SmartLi is a lithium UPS solution using smart lithium-ion batteries to deliver safe, efficient, and scalable backup power for data centers and critical facilities. Active current balance control allows the mixed use of old and new battery cabinets, providing flexible expansion. Automatic grouping and capacity checks reduce manual testing costs and avoid power. SmartLi is a battery energy storage system developed by Huawei for UPS, which has the features of safety and reliability, long lifespan, space saving and easy maintenance.
