

Ireland New Energy Battery Cabinet Project

Overview

The long-duration storage project is co-located with the 55.8MW Cushaling Wind Farm and represents a major national milestone, enabling more renewable energy to be stored and discharged during peak demand, reducing curtailment, and providing critical grid-stabilising services. With around 800 MW of grid-scale batteries now operational, a planning pipeline of over 10 GW, and the country's first four-hour battery system launched in early 2026, the technology is moving from a niche grid service to a central pillar of. Statkraft, the largest producer of renewable energy in Europe, has launched Ireland's first ever four-hour grid-scale Battery Energy Storage System beside its windfarm at Cushaling in Co Offaly. It can store enough power to supply 10,000 homes with renewable electricity for a full four-hour period.

Partnership marks Form Energy's first international deployment and a major milestone for the future of Ireland's electricity system. Somerville, MA – March 17, 2026 – Form Energy, an American energy storage company, and FuturEnergy Ireland, a leading Irish clean energy developer, today announced an. Shannonbridge B, delivered in partnership between Lumcloon Energy and Hanwha Energy, combines a 4,000MVA Synchronous Condenser and a 180 MWh Battery Energy Storage Project. Ireland's first hybridised grid-stabilisation system was officially opened today by Taoiseach Micheál Martin at a. United States-based Form Energy will deploy its iron-air multi-day battery technology at the Ballynahone Energy Storage project in northwest Ireland.
