

# US solar energy storage in 2025

## Overview

Energy Storage Market Outlook Q1 2026 (ESMO) released today by the Solar Energy Industries Association (SEIA) and Benchmark Mineral Intelligence, as of 2025, 137 GWh of utility scale storage has been installed in the United States. 19 GWh of commercial and. According to the U. energy storage industry installed a record-shattering 57.6 gigawatt-hours (GWh) of new capacity in 2025, the largest single year of new battery capacity additions on record. Despite actions in Washington targeting clean energy, energy storage installations grew 30% from the previous. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. This amount represents an almost 30% increase from 2024 when 48. The utility-scale sector shrank nearly 40% quarter-over-quarter in the fourth quarter. 7 GW of wind generation will be deployed this year, accounting for nearly 93% of total new capacity, which is expected to reach a record 63 GW.

## Article Content

EIA forecasts US solar, wind and battery storage to

New data recently released by the US Energy Information Administration (EIA), and reviewed by the SUN DAY Campaign, projects utility

Solar, batteries and wind to make up 93% of 2025 U.S. electricity ...

The U.S. Department of Energy's Energy Information Administration (EIA) forecasts 32.5 GW ac of utility-scale solar capacity and just over 18 GW of energy storage will be deployed in 2025.

Battery Energy Storage System (BESS) Costs and LCOS in 2024-2025: The ...

Liquid-Cooled Energy Storage Systems Liquid cooling has emerged as the preferred solution for thermal management in

US Adds 58 GWh of New Energy Storage Capacity in 2025

The U.S. energy storage industry installed a record-shattering 57.6 gigawatt-hours (GWh) of new capacity in 2025, the largest single year of new battery capacity additions on record.

U.S. Solar and Energy Storage Set for Major Growth in 2025

Energy storage systems, mostly large batteries, are important because they help store solar and wind power for use when the sun isn't shining or the wind isn't blowing. In 2025, over 31

Solar, battery storage to lead new U.S. generating capacity additions ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024

REPORT: 2025 U.S. Energy Storage Installations Set

Home Press Releases REPORT: 2025 U.S. Energy Storage Installations Set New Record, Surpass 2024 by 52% The U.S. installed 18.9 GW

US energy storage shatters records with 58 GWh

The Solar Energy Industries Association (SEIA) and Benchmark Mineral Intelligence say US battery installations reached a record 57.6 GWh in

REPORT: U.S. Adds 43 GW of New Solar Capacity in 2025, Marking

The U.S. solar industry installed 43 GW of new capacity in 2025, the top source of new energy capacity for the fifth consecutive year.

U.S. adds 26.5 GW of solar in 2025 as renewables

Solar and wind accounted for nearly 90% of all new utility-scale generating capacity added to the U.S. grid through December 2025, according to

US solar installations reach 43 GW in 2025 despite slowdown

Solar accounted for 54% of new US generation capacity in 2025, retaining its position as the top technology for the fifth straight year, while PV and storage together made up 79% of new...

US utility-scale solar PV LCOE tightens to US\$38

The LCOE for utility-scale solar PV in the US has tightened for a third year in a row, according to Lazard's latest report.

U.S. energy storage installations reach record 18.9 GW in 2025

The United States energy storage market installed 18.9 GW and 51 GWh of capacity in 2025, according to the quarterly Energy Storage Monitor report from Wood Mackenzie. This volume

U.S. solar and energy storage businesses secure near

U.S. solar and energy storage businesses continue to secure financing to scale business and build out the renewable energy transition across the

Renewable Energy Innovations 2025: 25+ Breakthrough

Discover the latest renewable energy innovations revolutionizing solar, wind, storage, and grid technologies. Expert analysis of 25+ breakthrough

Solar, battery storage to lead new U.S. generating capacity additions ...

In-brief analysis February 24, 2025 Solar, battery storage to lead new U.S. generating capacity additions in 2025 Data source: U.S. Energy Information Administration, Preliminary Monthly Electric Generator

600+ GWh of US energy storage expected by 2030:

The U.S. saw record battery deployments in 2025 and likely will again in 2026, propelled by utility-scale installations, according to a report prepared for

BloombergNEF confirms energy storage has reached the 100 GW era

The energy storage industry has reached the 100 GW era, with BloombergNEF's Energy Storage Market Outlook for 1H 2026 confirming that 112 GW was installed in 2025. Having tracked

Solar Market Insight Report 2025 Year in Review - SEIA

Solar accounted for 54% of all new electricity-generating capacity added to the US grid in 2025. Combined, solar and storage made up 79% of new

Solar and Storage Industry Research Data - SEIA

Storage deployments since the beginning of 2025 have focused on improving grid reliability and firming renewable energy generation. By storing excess solar

Five trends defining the U.S. energy storage revolution

The U.S. energy storage sector underwent a massive structural shift in 2025, moving from a niche reliability tool to an indispensable asset for meeting

SEIA: US installed 57.6 GWh of new energy storage capacity in 2025

The U.S. energy storage industry installed 57.6 GWh of new capacity in 2025, the largest single year of new battery capacity additions on record. Energy storage installations grew 30% from
