

When is the cheapest time to buy solar panels

Overview

For many US homeowners, fall is the best time to buy solar panels because it sets them up for a late winter/early spring installation, which has its advantages. The process of going solar typically takes between three to six weeks. Like most industries, residential solar has its busy and slow seasons. Summer is typically the busiest time of year because with the sun shining, air conditioners humming, and people wanting to take advantage of the tax incentives. Another reason why fall is the best time to buy solar panels is it can help you avoid overlap between your utility and solar payments. After all, replacing your utility bill with a lower solar bill. By shopping for solar panels in the fall you can improve your customer experience and minimize your first net metering bill. But there are a few other things to consider when choosing when to buy. Just like buying a house, solar is a long-term investment and there's more to be lost than gained by trying to time the market. The best time to buy solar panels is when you are ready to.
